Capitalize on Cost Cutting Technology.

The communications industry is undergoing unprecedented technological innovation. Cloud-based software continues to advance, enabling explosive growth through a business model that allows companies like yours to capitalize on high-value software and services like Hosted PBX and VoIP, SIP Trunking, Unified Communications, and much more, at one predictable monthly expense.

Why Choose SkyTalk Plus?

Reliable communications with a reliable local presence.

That's what you get from us right out of the box. SkyTalk Plus can provide your business a dynamic hosted phone system built just the way your business needs it, not the other way around. Our hosted cloud platform makes it easy for you to use, is easy to manage, scales easily as your business grows, and helps to future-proof your communications investment with one predictable monthly expense.

SkyTalk Plus does not sell directly to end users. We believe that there is an abundance of value to you, the customer, in having a local Authorized SkyTalk Plus Partner work with you onsite to determine your needs and recommend the correct SkyTalk Plus solution for your particular business. Your Authorized Partner lives and works in your community and is ready to support your company's communications needs.

Products and Services

Hosted PBX and VoIP

You want reliable, high-quality phone systems that simply work. And with your business in a constant state of change, simple can be challenging. But with SkyTalk Plus, transforming your phone system is simple regardless of your business - whether you have 3 employees or 500.

- Less up-front costs vs. hardware-based systems
- A host of features included in your package
- Predictable monthly communications expense
- Scales easily and affordably as your business grows

SIP Trunking

We offer SIP Trunking (virtual phone utilizing broadband access connection) solutions for any sized-business - whether you're a small business looking for the flexibility and cost savings of VoIP or a mid-sized business looking for business continuity, disaster recovery, and unlimited or metered calling plans, we may be able help you save up to 30% or more over traditional telephone lines.

Virtual Auto Attendant & Mobile VoIP

Get unlimited auto attendants, extensions, and mailboxes all configured to meet your exact requirements and individual business needs. You'll be able to utilize an unlimited combination of IP desk phones and softphones, while seamlessly integrating your call flow with your wireless technologies.

Unified Communications

Unified Communications (UC) is the seamless integration of voice, presence, chat, data, applications, and other technologies that help to drastically improve your communication processes and business productivity. Our platform and services enable you to seamlessly incorporate the latest UC technologies without investing in an expensive hardware-based system.

- **Mobility:** Communications on the go (data connection required).
- **Manageability:** Small to mid-sized businesses can provide a simplified service to compete more effectively with the competition.
- **Multi-User:** Large groups of workers or customers can collaborate on discussions or share resources, helping to maximize your budget.
- **Scalability:** With the constant change in technology, scalability is huge in today's business world and with UC, your services can be provided on a per-customer basis, cutting down unnecessary costs.
- **Disaster Recovery:** Your business can rest easy in a server emergency with the use of UC, where your data can be backed-up for rapid recovery.

API Integrations

We have several plugins and applications to help you further your communications needs such as click to dial, screen pops, call logging, and presence. The Operator console delivers all this and live visibility into your account for call control, call parking, visual voicemails, and much more.

Features and Benefits

Personal Flexibility

Our reliable, feature-rich hosted phone services adjust as you and your employees need them to. We make it easy for you to deploy the communication apps and solutions that your business needs, creating an in-office experience right at your fingertips, wherever you are on whichever device you choose. Commonly used features include: simultaneous ring, listen live, find me follow me, and more.

Business Continuity

Eliminate operational loss should part of your communications network go down. A recovery plan will help your business save potentially costly missed calls. Our platform helps to ensure customers or clients that call your business reach you in the event of a network loss.

Mobility Mastered

Mobility is paramount in today's business world. Keep your company connected with a wide array of mobile features from simultaneous ring to remote call control to help you conduct business anywhere through any device.

Customer Tested

To date, we've helped businesses of all sizes across the U.S. capitalize on the latest technology easily and effectively. With a full range of platform features and capabilities, you can rest easy knowing your business is taken care of, now and for the future.

Supportive and Collaborative

SkyTalk Plus and your Authorized Partner will be there to support your business at every level. Together, we'll help you with your specific needs or concerns, while giving you personalized customer support you won't find anywhere else.

Customer Approved

"I have two office locations and inherited a confusing phone bill from the previous agent. SkyTalk Plus saved me close to \$400 a month on my phone bill and the services have been exceptional. I would recommend SkyTalk Plus to anybody that is looking to save on their phone bill."

- Farmers Insurance Agent
